Dear Ms. GUO,

after having been full professor at Sapienza Rome University for many years, I now have the honour of presiding over Sapienza Rome University's Innovative Startup SARA ENViMOB Srl. The Startup carries out research, vocational training, and dissemination of research results using the skills of researchers with a long experience of international research and especially of young people who are now starting their career.

Our Startup came to know from the M.A.R. Association of the International Educational Exchange promotion between Italy and China's Hainan Province through mechanisms such as:

- encourage direct contact and cooperation between professional Institutes, Universities, private Schools, private Companies.
- promote exchange of teaching programs and methods.
- Promote students exchange programs (undergraduate and graduate level) between Italy and the Chinese Province of Hainan.

We confirm our interest to be part of such cooperation intents and we would be honoured to introduce our Innovative Research Startup features with the aim of finding a common and fruitful way of collaboration.

We are willing to meet with you during your Italian visit, to implement the progressive development of relationships in order to identify the first steps of exchange.

the President

prof Corrado Fanelli
